

One pedal for brake

We have 5 models of one pedal dual brake

1. ACAR-B1

Please see below pictures, this model no need to drill holes on you car, easy to install and easy to remove it when you don't need it.

Installed looking for automatic vehicle

Driving seat looking

Passanger seat looking

2. ACAR-B2

The inner wire for this model is 3.0mm, more durable, this model need to drill holes on the driver side to fix the steel bar. This one is good for the one who use the dual brake long time. Here is the feedback from our client who use ACAR-B2.

Hello Maria ~

Thank you for the information. To be honest, I like the B2 much better. It seems stronger, and the cable does not move with the brake, so there is less wear... and I don't like the cable above the pedal.

I am happy with your B2.

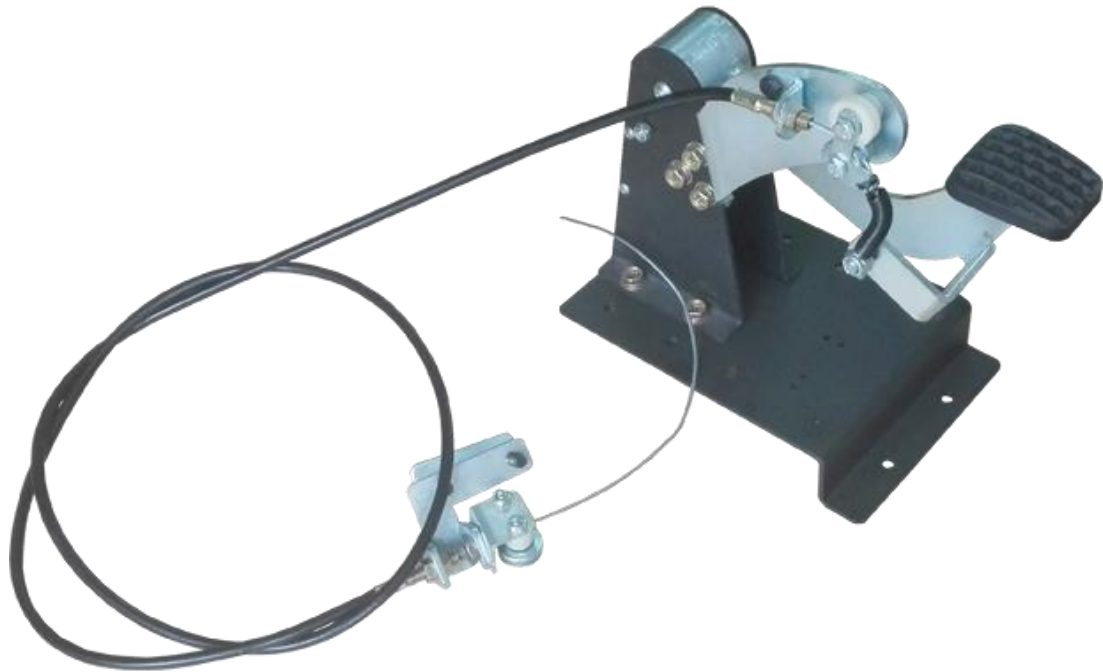

Thanks
Hank

3.ACAR-B5

This model is good for big truck, bus, pick up. Long cable, 3.0mm inner wire, more durable.

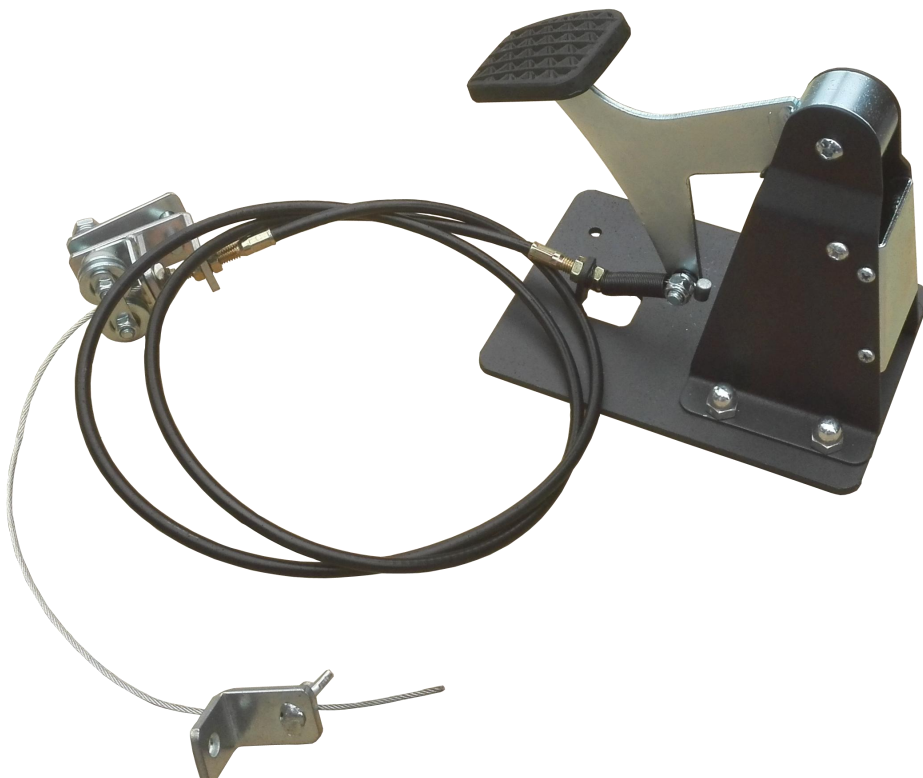

4. ACAR-B6

This model is aluminum alloy house, good looking, and the color of the outer house could painting different color as you like. So we recommend this one to ladies. No need drill holes. Easy install and remove.

5. ACAR-B9

The base of this model is smaller, see below picture.
Cable type, no need to drill holes, easy install and remove.
This one is our latest model.

Driver side

Passanger side
